

International Workshop on Ocean Acidification

Consequences for Marine Ecosystems

The acidity of the world's oceans is increasing by absorbing rising atmospheric CO₂. Ocean acidification can lead to global marine biodiversity loss. This workshop will provide a platform for young scientists from South Asian countries to get acquainted with the latest scientific developments in the field

of ocean acidification research through interaction with some of the leading scientists recognized globally. One of the important outcomes of this workshop will be to facilitate collaborative research on acidification in South Asia, which is lacking presently.

20th – 21st September, 2013.

Venue:

Indian Institute of Science Education and Research-Kolkata (IISER-K), Salt Lake, Kolkata, West Bengal, India.

Organized by:

Laboratory of Integrative Taxonomy and Microbial Ecology, Department of Biological Sciences, IISER-Kolkata.

INVITED SPEAKERS (CONFIRMED):

Richard Bellerby, Norwegian Institute of Water Research, Norway.
Stephen Widdicombe, Plymouth Marine Laboratory, United Kingdom.
Bayden Russell, University of Adelaide, Australia.
V. Thiyagarajan, University of Hong Kong, Hong Kong SAR.

Important Dates

Registration opens: 10th June, 2013.

Registration & Abstract submission

Deadline (poster): 30th August, 2013.

Registration Fees

Ph.D. Student- 3,500 INR

Postdoc- 4,500 INR

Faculty - 6,000 INR

Foreign Scientist - 200 USD

No refund following cancellation.

Preferences will be given to Young Scientists under 35.
