Niladri Modak awarded SPIE Optics and Photonics Education Scholarship

BELLINGHAM, Washington, USA – 10 June 2022 – **Niladri Modak** has been awarded a 2022 Optics and Photonics Education Scholarship by SPIE, the international society for optics and photonics, for his potential contributions to the field of optics, photonics or related field.

Modak is currently pursuing his PhD in the Bio Optics and Nanophotonics group led by Professor Nirmalya Ghosh in the Department of Physical Sciences at the Indian Institute of Science Education and Research Kolkata (India). His research includes exploring various spin-orbital optical effects and applying different protocols to enhance those, with a goal toward managing controlled manipulation of light in metrological and quantum information processing. “In this journey, the scholarship will give me motivation, economic support, and recognition, which, in turn, might ease the struggle,” noted Modak. “Thank you, SPIE!”

In 2022, the Society is awarding \$293,000 in education scholarships to 78 outstanding SPIE Student Members, based on their potential contribution to optics and photonics, or a related discipline. Award-winning applicants were evaluated, selected and approved by the SPIE Scholarship Committee, Chaired by SPIE volunteer Kate Medicus.

Through 2021, SPIE has distributed over \$6 million dollars in individual scholarships. This ambitious effort reflects the Society's commitment to education and to the next generation of optical scientists and engineers around the world.

SPIE, the international society for optics and photonics, brings engineers, scientists, students, and business professionals together to advance light-based science and technology. The Society, founded in 1955, connects and engages with our global constituency through industry-leading conferences and exhibitions; publications of conference proceedings, books, and journals in the SPIE Digital Library; and career-building opportunities. Over the past five years, SPIE has contributed more than \$22 million to the international optics community through our advocacy and support, including scholarships, educational resources, travel grants, endowed gifts, and public-policy development. www.spie.org.
